

Carbon Neutral Program

Achieving carbon neutrality begins with understanding your impact - followed by a commitment to make decisions that help your business thrive while minimizing emissions. Become a Carbon Neutral business with the help of a dedicated advisor to build out your plan and become fully certified.

How it works

We've designed a unique and actionable plan to ensure your path to Carbon Neutral is truly **approachable and risk-free.**

Our Carbon Neutral program:

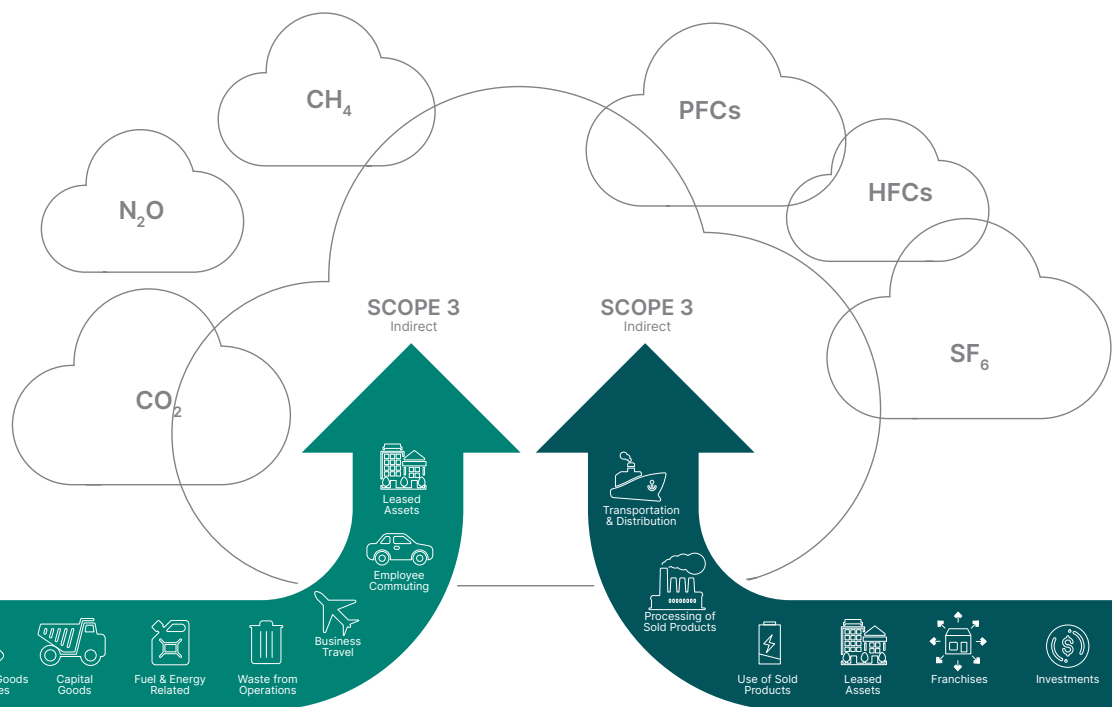

- Aligns with industry best practices for Carbon Neutral Certification.
- Follows the mitigation hierarchy to **avoid, reduce, replace, then offset.**
- Provides structure for clients to address uncertainties or imperfect data and still achieve Carbon Neutrality.
- Ensures our clients can be confident in the integrity of the certification and avoid any greenwashing.
- Has accurate data collection and emissions tracking in our award-winning Climate Smart software that allows clients to see and celebrate the results of their reduction efforts.

What it takes

Carbon Neutral is an opportunity for your organization to demonstrate commitment to emissions management.

Unlike the Climate Smart Certification, where some scope 3 emission sources are optional to collect, **certain scope 3 emissions sources are required** for your footprint to become Carbon Neutral.

A greater emphasis is placed on emission reduction planning to ensure your actions focus on reducing your largest sources of emissions. In the true spirit of Carbon Neutral, and to avoid potential greenwashing, **we'll track reduction progress against these sources year-over-year** to ensure you can confidently showcase your Carbon Neutral Certification.

Through the Carbon Neutral program, **you'll receive additional support and guidance from BMO Radicle.** We'll work with you to improve data collection, create a more robust mitigation plan, purchase offsets for what can't be reduced, and track year-over-year progress.

With dozens of projects to choose from, you'll invest in high-quality offset projects that impact local communities and tell compelling stories.

Benefits

- You'll **become an industry leader** and gain a greater competitive advantage.
- Achieve further reductions while meeting mitigation goals.
- Truly walk the talk and do even more for the environment.
- Enhanced Carbon Neutral reporting & certification for use in marketing & ESG reporting.
- Increased data integrity and rigour while processing your emissions to give a more precise output of your footprint.
- Dedicated client advisor & support from BMO Radicle.
- Access and coordinate purchase of carbon offsets with impactful stories.
- Optional add-on for SBTi target setting.
- Assistance with improving data collection methods.

"Carbon neutral is an extremely exciting achievement, particularly for a brewery, and one of our size. We want to pave the way for others in the brewing industry, so we can work to becoming greener as a whole."

Matt Giffen, Founder - Bench Brewing
